

Binge-eating Disorder

Binge-eating Disorder is an eating disorder when a person repeatedly consume unusually large amounts of food with feelings of a loss of control over his or her eating behavior. Unlike other eating disorders, binge-eating disorder is not followed by compensation with induced vomiting or use of laxatives.

Symptoms

Eating unusually large amounts of food in specific amount of time

Eating large amounts of food even when full or not hungry

Eating until uncomfortably full

Eating more rapidly than normal

Eating alone or in secret to avoid embarrassment

Feeling disgusted, depressed, or guilty about your eating
